Contents

Preface 1

Physical and mathematical modelling of extrusion processes 2
M. Arentoft, Z. Gronostajski, A. Niechajowicz, T. Wanheim

The effects of torsion on the initial geometry of bars having non-circular cross-sections 8
G. Brabie

Controlled hot forming of heat treatment steel grades in the intercritical (γ–α) region 13
L. Chabbi, W. Lehnert

Mechanical and tribological properties of aluminium-base composites produced by the recycling of chips 23
W. Chmura, J. Gronostajski

The calibration of metal-forming presses 28
K. Chodnikiewicz, R. Balendra

New methods of aluminium and aluminium-alloy chips recycling 34
J. Gronostajski, H. Marciniak, A. Matuszak

The constitutive equations for FEM analysis 40
Z. Gronostajski

Flow-stress functions for the computer simulation of metal forming 45
F. Grosman

Use of two behaviour laws for the determination of the forming-limit stress diagram of a thin steel sheet: results and comparisons 49
A. Haddad, R. Arrieux, P. Vacher

An investigation of the abrasive and erosive wear of flame-sprayed coatings 54
T. Hejwowski, S. Szewczyk, A. Weroński

The production and application of metal matrix composite materials 58
J.W. Kaczmar, K. Pietrzak, W. Włosiński

Temperature reduction in the cutting zone in water-jet assisted turning 68
J. Kaminski, B. Alvelid

The applications of ANNs in certain materials-analysis problems 74
J. Kasperkiewicz

A new generation of concrete in civil engineering 80
A. Kmita

Comparison of two methods for the analysis of composite material 87
P. Konderla, T. Mokanek

The publisher encourages the submission of articles in electronic form thus saving time and avoiding rekeying errors. A leaflet describing our requirements is available from the publisher upon request.

CONTENTS Direct

This journal is part of **ContentsDirect**, the ***free*** alerting service which sends tables of contents by e-mail for Elsevier Science books and journals. You can register for **ContentsDirect** online at: **www.elsevier.nl/locate/contentsdirect**

Elsevier Science B.V.

High damping functional materials prepared by spray deposition 94
Y. Liu, J. Li, G. Yang, Y. Lu

Application of the boundary element method for the numerical modelling of the solidification of cylindrical and spherical castings 99
E. Majchrzak, B. Mochnacki, R. Szopa

Determination of the frictional properties of coated steel sheets 107
A. Matuszak

A manufacturing tool for a new century 112
M. Mazurkiewicz

Technology and mechanical properties of ceramic preforms for composite materials. 119
K. Naplocha, A. Janus, J.W. Kaczmar, Z. Samsonowicz

Warm deformation of carbon steel 123
A. Niechajowicz, A. Tobota

A new model describing the hot stress–strain curves of HSLA steel at high deformation. 131
I. Schindler, E. Hadasik

Mechanical features of biocomposites containing porous corundum grains. 136
Z. Święcki, D. Wala, G. Rosiek

Transition processes: a survey of German industry 141
E. Westkämper, M. Hüser, R. von Briel

Problems of multi-step forming sheet metal process design 152
Z. Zimniak

Application of a system for sheet metal forming design 159
Z. Zimniak

Infiltration of the metal through a bundle of continual fibers 163
M. Žitňanský, M. Martinkovič

Analysis of the thermal fatigue process 167
R. Żuchowski

Advances in materials applied in civil engineering 173
K. Flaga

Development problems of materials in mechanical engineering 184
A. Maciejny

Rapid tooling: the state of the art 191
A. Rosochowski, A. Matuszak

Identification and classification of flow-dependent defects in the injection forging of solid billets 199
R. Balendra, Y. Qin

Analysis, evaluation and compensation of component-errors in the nett-forming of engineering components 204
R. Balendra, Y. Qin, X. Lu

Mechanical properties and microstructure of ULCB steels affected by thermomechanical rolling, quenching and tempering . . 212
A.K. Lis

Agents as building blocks of responsibility-based manufacturing systems 219
J. Madejski

Finite-element simulation of large plastic deformation. 223
M. Pietrzyk

New trends in the development of mechanical engineering materials. 230
S. Wojciechowski

Present and future developments of metal forming: selected examples 236
W. Voelkner

Grain size evolution model of selected copper alloys bases on new methods of softening kinetics determination 243
Z. Gronostajski

Factors influencing friction in steel sheet forming. 250
A. Matuszak

Finite element analysis of a tailored blanks stamping process. 254
Z. Zimniak, A. Piela

Implementation of the forming limit stress diagram in FEM simulations 261
Z. Zimniak

New development of shear fracture research 267
E.S. Dzidowski, W. Cisek
